                                   ## Introduction
                                   Local Dining Guide is a user-friendly platform that aims to connect users with local dining
                                   options. It provides a rich and intuitive interface to search for restaurants, view their menus,
                                   read reviews, and get directions. With a focus on enhancing the dining experience, this
                                   software solution strives to bridge the gap between diners and local eateries.

                                   ![Banner](https://github.com/yasmin-nadia/markdown/blob/main/OIP%20(1).jpg)

                                   ## License                                              [ Resolve in Merge Editor ]
                                   This project is licensed under the [MIT License](https://www.bjitacademy.com/MIT-License).
